

## About Stratodesk

Stratodesk is the world's leading endpoint OS and management solution. It is used by government and healthcare organizations, banks, SMBs and large enterprises to eliminate cost and scalability obstacles facing their complex network of devices. By delivering the only management software for mixed environments of x86, ARM and Raspberry Pi devices, Stratodesk is reinventing endpoint computing for enterprise IoT and VDI. Our cutting edge, linux-based solution, NoTouch, is hardware agnostic and runs on the Raspberry Pi.

## About Imprivata

Imprivata®, the healthcare IT security company, provides healthcare organizations globally with a security and identity platform that delivers ubiquitous access, positive identity management, and multifactor authentication. Imprivata enables healthcare securely by establishing trust between people, technology, and information to address critical compliance and security challenges while improving productivity and the patient experience. For more information, please visit [www.imprivata.com](http://www.imprivata.com).

»» **Stratodesk and Imprivata:  
Better Together**

Virtual Desktop Infrastructure (VDI) provides productivity, manageability, and security benefits to large enterprises, SMBs, and other organizations across multiple industries. However, making the leap to VDI is not without its share of challenges. Businesses and organizations must make significant investments and overcome obstacles before they can get the full benefit of virtual desktops. For large organizations in particular, overhauling an entire network of existing

devices is a financial strain. Beyond hardware costs, there are the inevitable costs involved with Windows licensing, malware protection, IT maintenance and more.

Healthcare in particular struggles to make full use of VDI, given security requirements strictly regulated by government policy. Healthcare providers must be able to access confidential patient information on the go, wherever they are within the hospital, quickly and easily.

## Stratodesk and Imprivata Solve Common Challenges Facing VDI Deployments

Imprivata OneSign is the leading Identity Access management software provider in the world today and is regarded as the ideal solution for helping healthcare providers get quick access to all the apps and data they need from their virtual desktops.

Stratodesk software is the ideal complements to Imprivata, offering an all-in-one solution for endpoint management and computing. By centralizing IT management, reducing costs, simplifying desktop deployment and integrating seamlessly with Imprivata, Stratodesk NoTouch Desktop ensures your ability to harness the full effect of your VDI. Customers who use NoTouch Desktop can expect various benefits ranging from cutting costs to boosting security. For example, in healthcare, Stratodesk has saved an average of \$30,000 per year for organizations by repurposing hardware and has cut approximately 13 weeks of redundant IT staff hours by eliminating the need for time consuming, manual maintenance and patching of endpoints. Additionally, 1,215 hours per year have been reclaimed by organizations thanks to faster log-ins.

### NoTouch Desktop consists of:

- Stratodesk NoTouch OS
- NoTouch Center

## Imprivata OneSign and NoTouch Desktop: A Perfect Combination

Stratodesk software enables users to leverage the power of Imprivata OneSign to access workstations and applications by simply tapping their proximity badges, scanning their fingerprints, swiping their smart cards, or using a wide array of additional authentication modalities. The integration also supports Imprivata OneSign Fast User Switching (FUS) which allows multiple users to quickly and securely log in to shared workstations. Secondary and fingerprint authentication, which is increasingly becoming necessary for the prescription of controlled substances, is supported in both Citrix and VMware VDI environments.

In addition, Stratodesk NoTouch Desktop is affordably-priced and requires little effort to set up. The included NoTouch Center allows effective and automated management over all your devices and peripherals from the convenience of one location. Stratodesk NoTouch Desktop includes the Stratodesk Virtual Appliance and PXE server for your VDI.

**\$30000**  
average savings per year

**13 weeks**  
of IT staff hours saved

**1215 hrs/yr**  
saved due to faster log-ins

## How Do You Install Stratodesk NoTouch OS?

There are a variety of installation modes – full hard drive installation that wipes out the existing OS, USB mode that allows it to run on the machine without touching its existing OS, and PXE boot.

## Why is Stratodesk NoTouch the Right OS for Your Hardware?

NoTouch OS is the zero-attack surface, hardware agnostic OS perfect for your VDI. Complete with Imprivata support, NoTouch OS is easy to set up, configure, and manage right out of the box.

## Discovering and Configuring Endpoints with NoTouch Center

Discovering endpoints with NoTouch Desktop is easy and can be done automatically. You can discover your endpoints by going to tools and providing the IP address or an IP address range. NoTouch Center finds all of the endpoints in that range and adds them to an unassigned group. Once endpoints are discovered, configurations can be done on a group level. Lastly, NoTouch Center enables live inheritance of settings.

## Setting Groups

Several more advanced parameters and configurations exist within NoTouch Center. Specifically for VMWare connections, a variety of different parameters can be configured, including smart card logins, Speech mike support, multimedia support (including H.264 and Skype for Business), Cisco Jabber Devices, and your choice of PCoIP, Blast Extreme, or RDP.

## Getting Started

To learn more about how Stratodesk NoTouch OS and Imprivata OneSign can deliver on the full promise of your VDI without increased hardware, software and security costs, download a free trial at <https://www.Stratodesk.com/download> or contact your Stratodesk or VMware partner or sales representative.
