

Cutting Costs and Boosting Security: Stratodesk NoTouch Desktop and Nutanix Frame

Stratodesk NoTouch Desktop is the leading OS and management solution for your Nutanix Frame endpoints. The advanced solution is comprised of two components: NoTouch OS and NoTouch Center. The Linux-based, small footprint, hardware agnostic NoTouch OS allows companies to cost effectively scale their Frame deployment and seamlessly connect to NoTouch Center. NoTouch Center, capable of running on premises or from the Cloud, effectively manages your x86 and ARM/Raspberry Pi based devices, providing complete configuration, management, operations and maintenance capabilities from one centralized location.

HOW IT WORKS

Stratodesk's NoTouch OS converts new and existing PCs, Laptops, Thin Clients and Raspberry Pis into secure NoTouch Clients. These NoTouch Clients can then be discovered and managed by NoTouch Center. NoTouch Center is easily deployed onto hypervisors, including Nutanix Acropolis Hypervisor, for on premises or DaaS deployments, making it the ideal solution for Frame.

NoTouch Center communicates over HTTPS with NoTouch OS endpoints enabling configuration, operations and maintenance tasks to be announced securely to all endpoints.

KEY BENEFITS

Stratodesk offers an all-in-one solution for Frame deployments while delivering these key benefits:

- **Hardware Agnostic and Highly Scalable:**
Stratodesk software runs on any x86 or ARM based device (including Raspberry Pis). Replace your need for locally installed Windows and easily scale your Frame deployment.
- **Standardized Endpoints and Hardware Repurposing**
Standardize your endpoints by turning new and existing PCs, Laptops, Thin Clients and Raspberry Pis, regardless of manufacturer, into powerful, up-to-date NoTouch Clients.
- **Highly Flexible - Any EUC Environment, Any Cloud:**
NoTouch connects to a wide range of virtual desktops including Frame, Microsoft Remote Desktop/ Terminal Services, VMware Horizon View, Citrix Virtual Apps and Desktops (formerly XenApp/XenDesktop) and more.
- **Easy to Install and Boot:**
Choose from several boot and install options including: Live Boot Mode or hard drive installation from USB, CD-ROM/DVD or via PXE Boot. Take advantage of the MSI Installer for massive rollouts or use Live Boot Mode to enable BYOD.

“Thanks to our partnership with Nutanix, we deliver next-generation endpoint computing and automated management to Frame deployments. Though we have always been a pioneer in delivering cutting-edge products that power and manage VDI endpoints, we are seeing more businesses look to the Cloud for a simple and secure way to deliver virtual apps and desktops. NoTouch fulfills this need while providing the best and most intuitive OS and management solution for Frame endpoints on the market.”

- Emanuel Pirker, CEO of Stratodesk

- **Central Management – NoTouch Center/NoTouch Cloud**

NoTouch Center is the remote device management and automation solution included in NoTouch Desktop.

NUTANIX READY VALIDATION

- Stratodesk NoTouch Desktop is validated with Nutanix AHV

ABOUT STRATODESK

Stratodesk offers the world's leading endpoint OS and management solution for x86 and Raspberry Pis. The hardware agnostic, Linux-based software suite is used by government and healthcare organizations, banks, SMBs and large enterprises to eliminate cost and scalability obstacles facing their complex network of devices. By delivering the only management software for mixed environments of x86, ARM and Raspberry Pi devices, Stratodesk is reinventing end-point computing for enterprise VDI, DaaS, and IoT. ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
